DORA Core Model

dora.dev/research

capabilities → predict → performance → predicts → outcomes
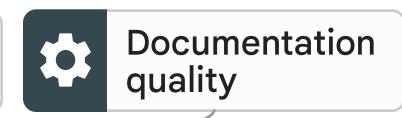

Flexible infrastructure

Documentation quality

TECHNICAL CAPABILITIES

- Code maintainability
- Continuous integration
- Database change management
- Deployment automation
- Empowering teams to choose tools
- Loosely coupled architecture
- Monitoring and observability
- Test automation
- Test data management
- Trunk-based development
- Version control

Shift left on security

Continuous delivery

Generative organizational culture

Streamlined change approval

Software Delivery Performance

- Change lead time
- Deployment frequency
- Change fail rate
- Time to restore service

Organizational Performance

- Commercial
- Non-Commercial

Wellbeing

- Less deployment pain
- Less rework
- Less burnout
